Test Case ID	DS_020	Test Case Description		Add way to retrieve the character name and image on the quiz page	
Created By	Claire Potter	Commit	commit d12c91758f354cff6e 1aef1cfcb6e7778c64 9bd7	Version	1.0

Tester's Name	Claire Potter	Date Tested	26/06/2021	Pass / Fail / Not executed	Pass

S #	Prerequisites:		S #	Test Data
1	Access to Browser		1	index.html
2	Account on GitHub and Gitpod		2	quiz.html
3	Utilisation of Code Institute Full Template		3	javascript
4			4	quiz javascript

Test Scenario	Add way to retrieve the character name and image on the quiz page

Step #	Step Details	Expected Results	Actual Results	Pass / Fail / Not executed
1	In the new quiz javascript file add the code to retrieve the character and character logo and to add it to the character section on the quiz page.	code entered and saved in the quiz javascript	N/A	N/A
2	Add default values in the case that data cannot be retrieved and returned	code entered and saved in the quiz javascript	N/A	N/A
3	Open preview browser with python3 -m http.server	Preview browser opens and displays.	As Expected	Pass
4	Generate character on index page and confirm. Select submit to move to question page.	Character displays, alert displays and quiz page opens	As Expected	Pass
5	Check that the character and logo display correctly	character and logo display as per selection	Fail - default value displays	Pass
6	Check the functions and correct element Ids	code entered and saved in the quiz javascript	N/A	N/A
7	Check that the character and logo display correctly	character and logo display as per selection	Fail - the value undefined now appears for both	Pass
8	Use the fix, instead of getting value from the element, retrieve innerHTML	code entered and saved in the quiz javascript	N/A	N/A
9	Check that the character and logo display correctly	character and logo display as per selection	Pass	N/A
10	Add the code to gitpod	Terminal performs without issue.	As Expected	Pass

11	Commit the code to gitpod.	Terminal displays successful commit message.	As Expected	Pass
